

A HIPAA-Secure, Cloud-Based Solution

It's time reimagine patient care logistics: healthcare is bogged down by inefficient processes, paperwork, human error, and a lack of transparency. VectorCare connects all members of the care team to collaborate seamlessly around patient care, while reducing cost and increasing operational growth.

The platform is HIPAA-secure and can include an integration with your existing EHR system. Our cloud-based platform means no lengthy installation or on-premise systems: start using VectorCare in days, not months.

Easy Implementation & Upgrades: No IT Team Required

VectorCare is cloud-based, requires no installation, and updates happen automatically. No code is required to build and manage highly configurable workflows with seamless deployment.

Best Practice Security Measures

- HIPAA-Secure at rest and while being transferred
- Regular 3rd party code audits to ensure platform impenetrability
- Advanced credentials encryption as well a lock-out safeguards protect account data
- Network access restricted to a private subnet
- 24/7 application performance and usage metric monitoring
- Application upgrades use a rolling deployment strategy, ensuring that traffic is never interrupted

“We took this onerous, homemade process that we were limping along with...to something that is sustainable and expandable into the future. It was a gamechanger for us.

–Regional Administrator at California’s largest healthcare provider
