# VectorCare

# Reduce Cost & Increase Compliance

Our innovative care delivery technology reduces operating costs while managing risk, eliminating fraud, and providing transparency across all service request lifecycles. Gather rich data across all Service Provider performance measurements to discover value-based opportunities without additional cost.

## Increase Efficiency

On average, it takes care team members 35 minutes to schedule each new service request. With the average RN salary of $69,106 across the US, switching to VectorCare can save your healthcare facility a minimum of $16.13 per request due to time saved. VectorCare saved one of our customers $27.4 million annually in time saved. No more phone & fax machine: increase bed turnaround times by utilizing our cloud-based technology.

## Reduce Liability & Manage Risk

Build a healthy network of credentialed, trusted Service Providers to broadcast requests to. Eliminate the liability risk of improperly credentialed providers while removing the administrative costs associated with comprehensive credentialing procedures.

## The Right Service, at the Right Time

Set medical necessity parameters for each service, ensuring that staff will only schedule services which are medically necessary for patients. Eliminate fraud, which characterizes 10% of all healthcare spending, by leveraging end-to-end performance reporting and data.

"Saving 15 minutes per request translates to more reliable and timely patient services... this system helps us grow operations by providing more services in the same amount of time without increasing staff."
